ABSTRACT

NOVEL 6-ALKOXY-2,3-DIAMINOPYRIDINE COUPLERS IN WHICH THE AMINO RADICAL IN POSITION 2 IS A DISUBSTITUTED AMINO RADICAL, AND USE OF THESE COUPLERS FOR DYEING KERATIN FIBRES

The invention relates to a dye composition that is useful for dyeing keratin fibres, containing at least one oxidation base and at least one coupler of the 6-alkoxy-2,3-diaminopyridine type in which the amino radical in position 2 is a disubstituted amino radical, to the use of this composition for dyeing keratin fibres and to the dyeing process using this composition.

The invention also relates to novel 6-alkoxy-2,3-diaminopyridine compounds that are useful as couplers.
